Your vehicle has a tire sealant and compressor kit that uses a liquid tire sealant to temporarily seal up to a one-quarter-inch puncture in the tread area of the tire. After using the tire inflator kit, it is recommended that you take the tire to an authorized retailer for inspection and repair as soon as possible, but at least within 100 miles of driving. The tire sealant cannot seal and inflate sidewall damage, punctures larger than one-quarter inch or a tire that has unseated from the wheel. The sealant can only be used on one tire and for one time before its expiration date. ¹⁴ Some accessories may not be available on all models. See dealer for details.
